**Step 6:** You may also configure network by device hotspot, go to WLAN setting to connect the device hotspot and return to this page, it will start to connect automatically.

Step 7: Please be patient during the connection process.

**Step 8:** It will automatically switch to the home page after the pairing is successful and the data will take few minutes to upload to the cloud.

Please wait for the data to be uploaded because the newly paired device may display offline status. The process may take about 3~5 minutes.

#### Add device to sub-account

The ECOS account that adds the device for the first time is the main account, it can share the QR code of the device so that other ECOS accounts can add that device by scanning the QR code.

# WiFi Communication Module Pairing Instruction

# Add more device

• Approach 1: Tap the device name at the top of the home page, expand the device list, then tap "+" to scan QR code on WiFi module.

Approach 2: Go to Me, tap "My Devices" then tap "+" to scan QR code on the WiFi module.
